

**Identify. Manage. Secure.**

## Introducing ContentKeeper's New Gen Cloud Express Web Filter for K12

The Next Evolution Beyond Cloud 1.0 in Providing Anywhere Content Visibility and Control – in School or at Home.

- **100% Device Agnostic** – Not just strong with Chromebook management, but an advocate in equal opportunity for ALL Devices to thrive under a central management platform.
- **100% NOT a Browser Solution** – Chrome, Internet Explorer, Firefox, Safari, you name it. We don't have limits and protect it all. Let us help you move beyond Cloud 1.0 browser limitations.
- **100% Able to Understand the Subdomain Landscape** – Google sites (Translate), Vimeo, Youtube – have strong K12 values. Let us intelligently block the bad Vimeo so your students can learn from its K12 relevant information. Over blocking is the enemy.
- **100% Intelligent & Realtime Reporting** – We understand that “To Kill a Mocking Bird” is good, while “How do I kill myself” requires an immediate and realtime response.

AND - **All ContentKeeper deployments are 100% turnkey.** Our K12 engineering team provides the intelligence, then the engineering horsepower to design your deployment, then fully execute it.

We are ready to take your visibility and control to the next level, beyond Cloud 1.0, when you are ready.
