

CYBERSECURITY PARTNERSHIPS

CISO/Cybersecurity Program Development

- Work collaboratively with Technology Leadership to determine current posture and short-term/long term needs
- Assist in the development of a mature cybersecurity program aligning with the NIST and Texas Cybersecurity Framework
- Provide policies and procedures for the School District that aligns with NIST

Configuration Security Maturity Review

- Discussions with staff on current configuration processes
- Review of system configurations for secure compliance with manufacturer recommendations and alignment
- Limited Pen Testing engagement to determine organizational maturity

Incident Response Planning

- Discussions with staff on current IR plans and needs of departments
- Assist Technology Staff and other departments with IR plan template and revisions to fit organizational needs
- Ongoing and follow up support for IR plan testing - Tabletop and live action exercises

Cyber Insurance Review

- Review of existing or incoming cybersecurity insurance plans
- Discussion and knowledge transfer with Technology and Risk Management Departments about Insurance requirements
- Ongoing support and assistance understanding and meeting the needs of the insurance policy

Staff Knowledge Transfer

- Ongoing technology discussions centered around MITRE Attacks, mitigation and detection efforts as well as configuration best business practices
- Knowledge transfer/training to employees throughout the engagement to ensure they fully understand what is being implemented, how to support it going forward and the implications in a K-12 environment
